Soft Care™

Soft Care Dermasoft

Reconditioning hand cream

H9

Description

Soft Care Dermasoft is a reconditioning cream for softening and moisturising skin of hands.

Key properties

Soft Care Dermasoft is a reconditioning lotion based on waxes and esters. This product is an excellent reconditioning cream, providing softness and smoothness to hands, which are deprived of their natural moisturising factor and protective secretions during work (for example cleaning work). In this way it prevents dry, cracked and split skin.
Soft Care Dermasoft has also been formulated with emollients and moisturising agents, which have been shown to assist in healing and soothing broken skin.
The product should be used for reconditioning of hands after completion of work.

Soft Care Dermasoft has been formulated in accordance with the European Cosmetics Directive and as such is safe when applied according the directions for use.

Benefits

- Helps to prevent dry and cracked skin
- Easily absorbed into the skin (non-greasy)
- Provides softness and smoothness to hands

Use instructions

Apply one to two dosages to hands and rub well into clean skin after completion of work. A complete skin protection program will include using a skin barrier cream before going to work.

Technical data

Appearance:	White cream
Relative Density [20 ºC]:	0.987
Viscosity [mPa.s; 25 ºC]:	1100
pH [neat]:	6.75

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Store product away from extremes of temperature (temperature > - 5 ºC and < 40 ºC).

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.
